UX10 Exam Chair

The UX10 Exam Chair's breakthrough design maximises everyday patient comfort and caregiver efficiency for examinations and treatment.

Key Benefits

- | Three (3) Sections: Full lie-flat to chair positioning
- | Storage points for control and equipment
- | Built in backrest push handles for ease of movement
- | Singular formed base cover
- | Out of the way control and power cable management
- | Forward tilting and side egress
- | Designed, manufactured and assembled in Australia

Application

A specially designed examination chair and bed in one – for new levels of comfort, safety, ease and flexibility, even in the tightest spaces.

Why Buy?

We designed and developed it with [specific input](#) by one of Australia's largest metropolitan hospitals – ensuring every detail has practical day-to-day benefits in today's dynamic healthcare environment. Instantly adjustable from chair to lie-down table, its electronic height variability takes ease and safety to new levels. Patients can sit upright, recline, lie flat or even tilt – with the stability of twin powered columns under the chair. They can move on and off the chair with confidence, with its unique ultra-low height option. The lightweight design and large castors make it a breeze to move around consultation rooms, clinics or hospital departments.

[Assembly Guide.](#)

UX10 Exam Chair

Ultra-low height

Make it easier and safer for patients to get on and off.

The very low seat height of this chair with fully retracted sides helps with easy egress and takes away the requirement to use step stools or unnecessary heavy lifting. Sit and position your patient comfortably and then raise them to the desired work height with the touch of a button.

Head and foot tilt

Up to 14-degrees Trendelenburg positioning with tilt towards patients' head or feet.

Transition a patient into the Trendelenburg position quickly in an emergency.

Low - High seated

Great low - high range for all medical applications.

Lies flat

The backrest and leg rest move independently or together from chair to bed.

You have the flexibility of sitting a patient up to almost 90 degrees or lying down completely flat. There is a CPR function to lie the backrest flat quickly in case of emergency.

Easy transfer

Conveniently positioned handles and large wheels for ease of location.

Lock in the steer castor and use the push handles to move the chair effortlessly to where you need it.

Low - High lie flat

Patient friendly low - high lie flat positioning.

Specifications

Size: 650mm wide x 1350mm overall (1900mm lying flat).

Comfort: 75mm thick premium, sealed, removable cushion.

Height Range: 500mm - 880mm with lie-flat and forward / reverse tilt.

SWL: 220kg.

Castor Size: Large twin wheel 125mm castors with 4 x brake and steer.

Product Code

UX10-EC

Contour Exami

An economical, customisable, easy to move examination table available with or without dropsides.

Key Benefits

Safe & low: The 400mm low platform height of this table takes away the requirement to use step stools or unnecessary heavy lifting.

Excellent height: Electrically adjust the patient height up to 930mm helps to examine or treat your patient without having to stoop over, ensuring easy access and less stress.

Comfortable: 100mm fluid proof Protran mattress with a welded, pressure relieving cover.

Custom quality: Manufactured in Australia with speed, quality, and care, plus customisation capability

Longest warranty: Peace of mind with a lifetime of local support, easy maintenance, and fast guaranteed parts.

Application

Ideal for medical clinics, examination rooms, schools, prisons & mining sites.

Why Buy?

This patient platform is typically used in a wide range of areas such as medical clinics, examination rooms, schools, prisons and mining sites. Helping patients on and off an examination table is easy and safe with a design that allows the mattress platform down to 400mm, lower than a standard office chair height!

Uniquely, these stretcher examination tables are designed to be easily moved around and re-positioned due to their light-weight build and large castors. There are a range of accessories and customisations available to ensure the unit is designed to be priced and configured best to practically fit into your modern facility.

Contour Exami

Without dropsides

If you require a patient examination table, then this is worth considering. The standard Contour Exami without dropsides gives all the same functionality as an examination table, however has the additional value of colour choices and accessory mounting, while being very easy to move and reposition as required.

Ultra-low height

Make it easier and safer for patients to get on and off. The 400mm low platform height of this table takes away the requirement to use step stools or unnecessary heavy lifting. Sit and position your patient comfortably and then raise them to the desired work height with the touch of a button.

Excellent high height

Don't strain your back, raise a patient up to your best working height. Lifting the platform height up to 830mm (plus an extra 100mm for the mattress pad thickness), helps you to examine and treat your patient without having to stoop over, ensuring easy access and less stress. The backrest travels from 0 to 85 degrees with emergency CPR quick release option available.

15 degree head and foot tilt

A generous 15 degrees top tilt both directions. Position a patient how you need them or quickly lower their head down (and feet up) in an emergency.

Dropside, cover, colour options

Upgrades such as wider top, dropsides, base cover, colours and accessories. This is a very flexible platform with excellent customisation available. Change the standard Contour Exami from a basic examination table into an economy patient stretcher.

Go anywhere

Change from the standard 125mm twin to 175mm single castors for situations such as outdoor. If there is a requirement to wheel over rougher concrete, sand or grass terrains, this option gives larger diameter rubber wheels with 50mm extra ground clearance under the stretcher.

Specifications

Overall Size: 2135 x 815mm (965mm wide option).

Patient Surface: 1900 x 680mm (830mm wide option).

Height Range: 400 - 830mm.

SWL: 300kg.

Castor Size: 125mm twin wheel castors, 4 brakes and 1 steer.

Includes: 100mm Protran mattress, electric backrest that raises to 85 degrees, standard main power electric operation.

Options: dropsides, base cover, battery back-up with cable retractor, larger castors and 7 endrail colours.
