

Aquatuff

A stainless steel shower trolley with hydraulically operated 300kg SWL and wide top option.

Key Benefits

Safe & secure: The dropsides fold underneath the top and the liner side lays down to provide gap free patient transfers.

Hygiene conscious: Tilt the top 2 degrees and lower the drain hose tip to quickly remove waste water.

Custom adjustments: Raise or lower the height of your trolley to suit bed transfer or best working positions. You can also lock the removable end rails into two positions, allowing 120mm extra space for longer patients.

Why Buy?

Having equipment that is robust and completely reliable is of the utmost importance when caring for larger or heavier patients. We have over-engineered the componentry strength in this design and our decision to use total stainless steel reinforces the lifetime of value that this bariatric shower trolley will give. The hydraulic operation helps to safely lift 300kg without overload, whilst four twin wheels with brakes and wider top all increase versatility in special needs.
