Contour Portare

An ultra-low electric transport stretcher custom-designed by Modsel at an affordable price.

Features

- Economical transfer trolley
- E-Point steering system
- Emergency CPR backrest release
- 15° head and foot down Trendelenburg
- 300kg weight capacity
- 350 - 800mm height range
- Fully electric operation
- 150mm twin wheel castors
- 2135 x 815mm overall size
- 965mm wide top option (150mm wider than standard)
- Dropside handrail PVC upgrade option
- Choice of 7 dropside armrest/end rail colours for easy identification

Product Code

- MPT-C-PE2
- 150mm Wider Top; MPT-CA-WCT
- PVC Dropside upgrade; MPT-CA-CP-PPVC

Summary

Helping patients on and off this general purpose stretcher has never been so easy or safe with a design that allows the mattress base down to our record breaking 350mm, lower than a standard office chair height!

Transport must always be considered and with our new E-Point system, a strong grip with the floor and solid, perfectly centred steer wheel ensures the stretcher always accurately tracks and turns. We are now able to bring Modsel stretcher design at our most affordable price ever, helping to meet tighter budget constraints and maximising the number of working units available.

Contour Classic

The most flexible platform available for a transport stretcher.

Features

- Fully customisable stretcher
- A variety of dropside options
- Emergency CPR backrest release
- 15° head and foot down Trendelenburg
- Electric and hydraulic versions available
- 300kg weight capacity
- Electric height ranges: from 440 - 810 up to 570 - 940mm
- Hydraulic height ranges: 530 - 760, 565 - 830 or 630 - 960mm
- 200mm large bearing castors
- 2135 x 815mm overall size
- 705 narrow and 965mm wide top options
- Choice of 7 dropside armrest/end rail colours for easy identification

Product Code

- Electric - MPT-C-CE
- Hydraulic - MPT-C-CH

Summary

The most flexible platform of all our stretcher range. The twin column design allows for multiple height range choices - build in low heights for patient egress care or high heights for better surgeon access and less strain during procedures.

Tailor make the Contour Classic with shorter, longer, narrower and wider top sizes and select from a range of dropside styles to suit specialised procedures or the patient type you are working with. To simply put it, there is a high level of customisation possible with many accessory mounting options and solutions.

Contour Deluxe

A transport stretcher with glide away dropsides for zero transfer gap.

Features

- Full length gas assisted siderails
- Emergency CPR backrest release
- 15° head and foot down Trendelenburg
- Electric and hydraulic versions available
- 300kg weight capacity
- Electric height range: 570 - 940mm
- Hydraulic height range: 630 - 960mm
- 200mm large bearing castors
- 2135 x 815mm overall size
- 965mm wide top option
- Choice of 7 end rail colours for easy identification

Product Code

- Electric - MPT-C-DE
- Hydraulic - MPT-C-DH

Summary

Safely transfer patients with a zero transfer gap created by siderails that glide down under the top, leaving no obstruction on the side of the stretcher. Gas assistance ensures they are always light and easy for the operator and there is quick access with release catches on both ends.

Provide a greater level of support with these extra length siderails featuring horizontal bars and reduced gaps. Built for a lifetime, the fully welded and polished stainless steel construction leaves no risk of coatings to chip and rust, creating infection hazards or strength reduction.

Concealment Trolley

Lightweight, removable frame and washable block-out cover fitted to an Aqua trolley for transfer privacy.

Features

- Heavy duty washable cover
- Zips down each corner
- Smooth, one-piece, cleanable trolley top

Product Code

- MST-SA-MTU

Summary

Unzip one side and fold the cover back to slide a deceased patient onto the flat, smooth surface of an Aqua trolley top. Height adjustment and fully fold under dropsides help to ensure transfer is as easy as possible.

Change Table

A purpose built, non-slip change mat for a solid, height adjustable and safe patient platform.

Features

- 25mm high density foam core
- Heavy duty welded vinyl cover

Product Code

- MST-SA-CTU

Summary

Add this mat to any Aqua trolley model to expand its use into a very safe, height adjustable change table with full length dropsides and end rails. The mat securely fastens underneath the trolley top to prevent sliding.
