- Forward / reverse, soft start and downhill control
- 20mm diameter steel towing pin

## Product Code

- SCMH-EMEE

## Summary

The Eurocare Enforce tug has been designed for healthcare use. Compact and easy to use, this powerful electric tug can be adapted to many standard trolleys, bins and carts in service throughout a facility, taking all the physical effort and risk out of manual movement. Many organisations have benefited from efficiency gains through reduced human input, consistent travel times and additional movement of equipment at the same time.
