Optional handle

# Stacking IV Pole - Premium MS

A compact, weighted stacking IV Pole with one-hand adjustment and colour options.

## Features

- Solid steel base double powder coated in a standard silver colour
- Rounded, non-obtrusive and safe design
- A range of base colour options available for departmental identification
- 28mm diameter pole size for pump mounting
- 4 hook design, 250mm across with 60mm height difference between hooks
- One hand lift and lock with simple release
- 10kg pump and 10kg hook capacity (evenly distributed, max 2.5kg per hook)
- Adjustable height pole from 1610mm to 2060mm
- Compact 470mm diameter, 12kg weighted base
- Quality, quiet, smooth 75mm twin wheel castors
- Optional adjustable height grab handle
- MADE IN QUEENSLAND

## Product Codes

- Stackable MS IV; SCIV-SWB
- Adjustable handle; SCIV-SSPH
- Custom colour base; SCIV-CC

## Summary

Store more IV Poles into the same floor area with these high quality, Australian made stackable IV Poles. The solid steel, welded design will ensure a lifetime of use and our custom colour coding option takes away all confusion. A simple one-hand height adjustment and generous hanging space on the special hook design makes these poles a pleasure to use. The extra heavy, rounded base design ensures very smooth and safe use.

Optional handle

# Stacking IV Pole - Premium SS

Fully stainless steel, compact weighted stacking IV Pole with easy adjustment and safety hook design.

## Features

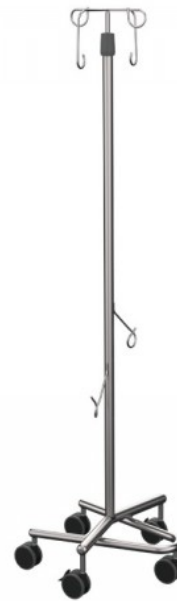

- Solid stainless steel compact and stable base
- Rounded, non-obtrusive and safe design
- Lower swiveling catheter hooks for ease of use
- 28mm diameter pole size for pump mounting
- 4 hook design, 250mm across with 60mm height difference between hooks
- One hand lift and lock with simple release
- 10kg pump and 10kg hook capacity (evenly distributed, max 2.5kg per hook)
- Adjustable height pole from 1610mm to 2060mm
- Small 470mm diameter, 12kg weighted base
- Quality, quiet, smooth 75mm twin wheel castors
- Optional adjustable height grab handle
- MADE IN QUEENSLAND

## Product Codes

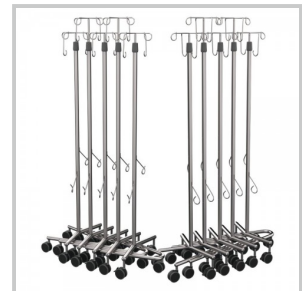

- Stainless steel IV with catheter hooks; SCIV-SWBP
- Adjustable handle; SCIV-SSPH

## Summary

Store more IV Poles into the same floor area with these high quality, Australian made stackable IV Poles. The solid stainless steel, welded design will ensure a lifetime of use. A simple one-hand height adjustment and generous hanging space on the special hook design makes these poles a pleasure to use. The catheter hooks safely revolve to prevent the unwanted catching of loose garments. The extra heavy, rounded base design ensures very smooth and safe use.

Height adjustable

Stackable

Safe hooks

Optional handle

# IV Double Hook

Change to a dual hook to restrict the carrying capacity and keep the IV compact during transit.

## Features

- Stainless steel twin hook design
- 160mm wide x 50mm deep

## Product Code

- SCIV-SS2H

## Summary

In some cases a smaller top design with less hooks may be required to control the weight and bulk of clinical products that can be carried during transportation, or if there are tight space constraints.

# IV Push Handle

Adjustable stainless steel push handle fixed into your desired height or position.

## Features

- Fully rounded stainless steel handle
- Lock into desired position
- Easy to clean with no coated surface to wear

## Product Code

- SCIV-SSPH

## Summary

Assist patient movement with a compact yet convenient handle that is fully rounded for safety. The stainless steel construction ensures best hygiene control with an easy to clean, non-coated surface.

# IV Storage Basket

Clean and compact wire basket to hold small accessories

## Features

- Dust free wire storage basket
- 220mm D x 135mm W x 125mm High

## Product Code

- SCIV-SSSB

## Summary

In some cases a small basket is required to store critical supplies or assist in patient movement. The dust free wire design helps to combat infection hazards.

# IV Oxy Holder

Carry and store a C sized oxy cylinder in a compact holder.

## Features

- Stainless steel construction
- Holds C sized oxy cylinder

## Product Code

- SCIV-SSOH

## Summary

This oxy holder allows the IV poles to still stack closely together to preserve the largest amount of precious space in tight facilities. Simply lift in and out the oxy cylinder as required.

# IV Coloured Bases

Choose a colour for your IV pole base to assist in departmental identification.

## Features

- Standard colour range with custom flexibility
- Durable powder coated colour coding

## Product Code

- SCIV-SSCB

## Summary

Ensure your IV poles are easy to identify and remain your departments special property with highly visual colour coding. Choose from a range of standard colours or we will work with you to meet unique custom requirements.
